

# Industrial Maintenance AAS

Career Program at Danville Area Community College  
Financial Aid eligible degree program

This program is designed to give an individual the diversified training required for persons employed in plant maintenance positions. When production workers encounter problems with the machines they operate, they call industrial machinery repairers. Industrial maintenance is important not only because an idle machine will delay production, but also because a machine that is not properly repaired and maintained may damage the final product or injure the operator.

## Program Specific Courses Include:

- Intro to Maintenance
- Technical Communication
- Arc Welding
- MIG Welding
- TIG Welding
- CNC Set & Operations
- Programmable Controllers
- Intro to CNC Programming
- Intro to Electricity/Electronics
- Maintenance Tools & Procedures
- Mechanical Diagnosis & Repair
- Electrical Diagnosis & Repair
- Hydraulic Diagnosis & Repair
- Pneumatic Diagnosis & Repair

## Job/Employment Information:

*Positions You are Trained for:* Industrial Machinery Repairers, Maintenance Mechanics, Industrial Electricians, Millwrights.

*Where Can I find a Job?* Industrial Maintenance Mechanics can find jobs in manufacturing industries, primarily food processing, textile mill products, chemicals, fabricated metal products, and primary metals; government agencies, public utilities, mining companies, and other establishments in which industrial machinery is used. Employment is concentrated in heavily industrialized areas.
