

## Learning Efficiency

Visualize a pyramid with 6 levels that represent levels of efficiency in learning. The levels go from the top down in terms of learning efficiency.

Level 1 at the top shows 5% efficiency in learning when simply listening.

Level 2 shows we are 10% efficient when simply reading and rereading.

Level 3 indicated that humans are 20% efficient in learning when simply hearing or seeing.

Level 4 shows a 30% efficiency when watching demonstrations.

On level 5, we are 50% efficient in learning when participating in study groups.

Level 6 clearly shows that we are 90% efficient in learning when we teach others.

The wise learner will include all 6 levels in learning whenever possible.

### **The Pyramid of Efficient Learning**

We are	5%	efficient when just listening
We are	10%	efficient when reading & rereading
We are	20%	efficient when just hearing or seeing
We are	30%	efficient watching demonstrations
We are	50%	efficient when in study groups
We are	90%	efficient by teaching others
