PATHWAY TO STUDENT SUCCESS AND COMPLETION

ANNUAL REPORT 2012-2013

Danville Area Community College
Danville Area Community College Foundation
A Message from The President

Danville Area Community College is recognized as a national leader in student success. While colleges and universities around the country work to develop new student completion strategies, DACC has been at the forefront of this movement since first becoming an Achieving the Dream College in 2009. We were pleased to receive further affirmation of our efforts with the designation as an Achieving the Dream Leader College last fall.

The College could not make these strides alone. We are able to offer greater student support and more relevant workforce development programs because of the dedication of faculty, staff, the Board of Trustees, and the DACC Foundation Board – dedication that is sustained through the strength of our community partners. We are grateful for the relationship with Julius W. Hegeler II that resulted in a $3 million planned gift and an expansion of the Technology Center. We appreciate the partnerships with Hoopeston-area individuals and organizations that took the DACC Higher Learning Center – Hoopeston from dream to reality. We realize that the success of the Foundation’s Endless Possibilities major gift campaign – over $10 million raised for student success and workforce development – stands on a solid foundation forged by our friendships in the community, and we value those relationships.

Please join me in celebrating the successes of the past year. We could not accomplish these achievements without your support.

Akie Marie Jacobs
President
Danville Area Community College
Danville Area Community College was one of eight institutions designated as a 2013 Leader College by Achieving the Dream and was recognized as a leader in the national student completion movement. DACC is showing promising progress in its student success efforts and is producing tangible results by increasing student persistence and closing achievement gaps.

The College focused its strategic planning process on understanding and addressing policies and procedures that could act as barriers to student success with a strong focus on first-year students. In addition to extensive faculty engagement efforts, Danville Area Community College implemented targeted initiatives such as mandatory orientation and restructuring of the assessment procedures in gateway courses. Through these efforts the college has increased success rates collectively in initial math and English gatekeeper courses from 56% in 2008-09 to 66% in 2011-12; and has decreased math and English gatekeeper courses achievement gap between minority and white students from 14% in 2008-09 to only 3% in 2011-12.

“Credit for receiving Leader College status goes to our outstanding faculty, staff, and Board of Trustees who have been willing to engage in discussions about student success, to examine critically data about our students, and to change policies and procedures that were barriers to students,” said President Jacobs at the Leader College Celebration. “Most importantly, the College has been willing to innovate with new methods of teaching and learning so that all students have an opportunity for success.”

President Jacobs also thanked the Lumina Foundation for funding DACC’s first year of involvement with Achieving the Dream, as well as the talented Achieving the Dream coaches and the Achieving the Dream network that helped the College see new ways of serving students and the community.

Achieving the Dream, Inc. is a national nonprofit that is dedicated to helping more community college students, particularly low-income students and students of color, stay in school and earn a college certificate or degree. Conceived as an initiative in 2004 by Lumina Foundation and seven founding partner organizations, today, Achieving the Dream is leading the most comprehensive non-governmental reform network for student success in higher education history. With almost 200 colleges, more than 100 coaches and advisors, and 15 state policy teams - working throughout 34 states and the District of Columbia – the Achieving the Dream National Reform Network helps 3.8 million community college students have a better chance of realizing greater economic opportunity and achieving their dreams.

“I am glad I chose DACC because it has really given me an affordable start to my college education. I feel much more confident and prepared going on to a university, having had the opportunity to attend DACC. I have a much better idea of what to expect than if I had gone to a university straight out of high school.”

Heidi Green, Second Year Presidential Scholar
Healthcare Coding Online (ICD 10) Prepares Students for Changes in Healthcare Data for 2014

First-year Health Information Technology program Director Marcie Wright, RHIT, CCS, jumped right in to fill a local need by creating an online ICD-10 training course to help prepare the healthcare community for a major operational change. Wright, an AHIMA certified ICD-10 CM/PCS Trainer, was the ICD-10 Implementation Chairperson at her former employer, the VA Illiana Healthcare System.

Healthcare documentation is converted into data by using codes that are assigned to specific diagnoses or procedures. Currently in the United States, ICD-9 is the code set used to report diagnoses and inpatient procedures; this will be replaced by ICD-10 October 1, 2014. Transitioning to the new ICD-10 coding format requires significant technology upgrades and thorough training of clinical, coding, and financial staff. Healthcare facilities will not receive reimbursement for services after October 1, 2014, if they do not submit claims in the ICD-10 format. The implementation of ICD-10 marks one of the greatest changes the medical coding field has ever experienced.

Those who benefit from this new 20-week, non-credit, self-paced online course include professional coders, providers, billers, claim examiners, medical assistants, educators, and students studying coding. For more information about the course, including registration steps, visit http://dacc.edu/cce/-med_code.php. The ICD-10 coding classes are also taught for credit in a traditional format as part of the DACC Health Information Technology degree program.

DACC Adds Certified Medical Assistant Program

At the request of local healthcare providers, Danville Area Community College added a new certificate program for fall 2013. The Certified Medical Assistant Certificate program trains students to perform routine, entry-level clinical and office duties in medical facilities such as physicians’, chiropractors’, or podiatrists’ offices and clinics. The program provides students with marketable skills that should lead to strong employment opportunities.

The Certified Medical Assistant will be able to perform clinical procedures, prepare the patient for physical exams, and assist the physician with other exams. The CMA may help the physician with minor surgical procedures and can sterilize and care for instruments. In some venues, the CMA is expected to handle administrative office procedures such as keyboarding, coding, billing, scheduling, transcription, insurance claims, and computerized record keeping. Program graduates are able to assist in EKG, first aid, and phlebotomy.

Courses in the program include Medical Terminology, Pharmacology, Medical Office Procedures, Clinical Procedures, Human Body Structure, Psychology/Ethics, and Communication Skills. It is a 39 credit hour certificate in the Business division.

Marcie Wright, Director of Health Information Technology Program

“From my first day at DACC, I knew I made the right choice. My professors have all gone out of their way to ensure success with every student in the classroom. It’s comforting to have professors that take time to understand my strengths and weaknesses to ensure I completely understand all material in the course. Not only is DACC affordable, DACC also has helpful staff and a class size that has allowed me to thrive in the classroom while meeting a wide variety of students.”

Hailey Tellier, DACC Foundation Scholarship Recipient and Vermilion County Fair Queen

Adaptability
Continuously meeting the changing needs of those we serve.
Danville Area Community College Foundation’s annual Honors Program celebrates the achievements of scholarship recipients at DACC and the generosity of the donors who support them. Without the support of scholarship dollars, many students’ potential might remain untapped.

On Friday, September 20, 2013, the DACC Foundation celebrated awarding a record-breaking 420 scholarships valued at more than $424,000 during the annual Honors program. More than 300 people gathered in Mary Miller Gym to honor the motivation and dedication of scholarship recipients while thanking the generous donors who made the scholarships possible.

Scholarship dollars often make the difference between students achieving their dreams or putting them on hold indefinitely. One of our scholarship recipients wrote, “Your scholarship has significantly improved my chances of reaching my goal to use my drawing skills to start a career. I have a passion for drawing and knowing that someone is willing to give me a chance makes me more motivated to achieve my goals. Having someone believe in me, as you have done, strengthens my hope to improve my life through higher education.”

Thank you to all the donors for providing scholarships, enriching students’ lives and making dreams a reality!

Officials at Danville Area Community College worked in concert with Hoopeston civic leaders and Hoopeston Area Healthcare Foundation to make the DACC Higher Learning Center Hoopeston a reality. A ribbon cutting and dedication ceremony was held September 9, 2013, and the newly renovated site opened for classes the following week. During the ceremony, a donor wall was unveiled listing all of the organizations and individuals who contributed to the initiative.

The building, donated to DACC by the Carle Hoopeston Regional Health Center, was previously used as that organization’s business office and was the first of many donations by area residents and businesses to make this location a reality. Extensive renovation resulted in five classrooms, including one computer lab, which allow up to five classes to run concurrently. Area residents Karla Coon and Kendra Morts serve as the Center’s Director and Office Assistant, respectively.

The Center offers a selection of General Education courses, and a variety of Community Education classes, year round, adding new classes each semester. It also hosts select College Express Dual Credit and Adult Basic Education courses. The site is intended to serve the higher education needs of the people of the Northern part of the college district, as well as communities in Western Indiana.

“I am glad that I chose DACC because the smaller class sizes allow you to get a more personal education compared to a larger four year university.”

Ryan Pinter, Second Year Presidential Scholar
DACC Continues to be a Military Friendly School

For the fourth consecutive year, Danville Area Community College was named a Military Friendly School by the publication, GI Jobs. As a Military Friendly School, DACC ranks in the top 15 percent of colleges, universities and trade schools in the country that are doing the most to embrace America’s military service members, veterans, and spouses as students and to ensure their success on campus.

DACC Shares ATIM Grant

Danville Area Community College has been approved as a training program in the Workforce Innovation Fund Accelerated Training for Illinois Manufacturing (ATIM) grant. As a member of the Central Illinois Advanced Manufacturing Partnership, a regional consortium that includes six local workforce investment boards, the community colleges serving the region and local employers covering 19 counties in Central Illinois, DACC is an approved training program for the region covering Local Workforce Area 18 and will train individuals in Mechatronics.

The ATIM program will provide over $100,000 to DACC to support integrated training programs for the area. The grant term covers the period from June 1, 2013 to May 31, 2015. The College is currently in the process of identifying candidates who qualify for the program. These instructional programs will be delivered by the DACC Corporate and Community Education division, in concert with the Technology division, in order to provide short-term training that will result in local employment.

DACC Celebrates McDonald’s Grand Opening & McPresident’s Day

The entire East Main Street corridor near Danville Area Community College brightened this past fall with the addition of a new restaurant. The theme and décor of the new Neighborhood McDonald’s at the corner of Main Street and Bowman Avenue features Danville Area Community College, Cannon School and VA Illiana Healthcare System.

College faculty, staff, and students were involved in seeing the project through to completion. College administrators served on the theme committee that helped choose decorations for the restaurant. Students and faculty in the DACC Horticulture program were instrumental in designing the unique “Flag Garden” on the property’s main corner that features flags from each branch of the military. Members of the College community gathered to help celebrate the Grand Opening and to witness the flag raising ceremony. Dr. Jacobs and representatives from Cannon School and VA Illiana Healthcare System raised the flags.

“The Witzels have become a dependable partner for Danville Area Community College,” stated Dr. Jacobs. “Their beautiful new Neighborhood McDonald’s promotes the College and our neighbors with its lovely décor, and the family has invested in the College’s new initiative in Hoopeston with both financial and promotional support. We wanted to demonstrate our appreciation of their efforts with more than mere words.”

A few days later, the Neighborhood McDonald’s sponsored McPresident’s Day to raise money for the DACC Foundation Student Emergency Fund. President Jacobs worked alongside college faculty and staff to show appreciation to the Witzel family for their support of the College while the Witzels donated 20 percent of sales totals for the effort. The Student Emergency Fund provides one-time grants to students who are at risk of stopping out of their education due to desperate financial situations.

“Each semester we see more students with needs than we have funds available, so this opportunity from McDonald’s is truly a blessing and helps to make a student’s dream reality,” said Tracy Wahlfeldt, Executive Director of the DACC Foundation.

Diversity
Providing a safe and secure learning environment for the personal and intellectual growth of those we serve, preparing them to participate in an increasingly changing world.
Appellate Court Visits DACC

Officials at Danville Area Community College were honored that the Fourth District Appellate Court heard oral arguments at the College in April. This event marked the first time that the Fourth District Appellate Court had met to hear oral arguments on a community college campus.

“It is such an honor to have been chosen as the first community college to host the Appellate Court,” said Dr. Alice M. Jacobs, President of Danville Area Community College. “Our faculty was pleased to be able to offer this rare opportunity for students to experience the real-world application of the concepts they study in class. The students recognized and appreciated this unique opportunity, as well.”

Students from Political Science and Communications courses were invited to attend the oral arguments and interact with the presiding justices at a luncheon following the sessions.

One local attorney who attended the sessions was heard to say that the students who attended the event were “very fortunate” and that he “hadn’t experienced anything like these sessions until he was in law school.”

Dillman/Vergin Family Supports DACC

Dr. David Dillman and his wife Cheryl Vergin came to Danville in the early 1980’s and quickly made it their home. Over the last 30 years, they have raised their dogs, nurtured their family, built their business, and contributed their time and resources to improving this community they adopted as their own. Their most recent contribution is a $50,000 gift to fund scholarships at Danville Area Community College.

The Dillman/Vergin Family Scholarship provides $1,000 scholarships through the DACC Foundation. The first recipient was chosen in the fall of 2012.

Dillman is known as an innovator in his field. His Dillman Eye Care Associates celebrated 30 years in business in 2011. While cataract surgery is the most commonly performed surgery in the United States, advances are being made regularly and Dillman is committed to bringing those advances to the community. Recently, the practice added ReLACS, the latest computer driven laser technology for cataract surgery. Dillman’s is one of only two practices to offer the service outside of the Chicago area. The other is near St. Louis.

“This procedure represents the second biggest advancement in cataract surgery in my lifetime,” said Dillman. “I’m exceedingly happy to be one of a handful of practices offering the procedure. The Femtosecond laser used in the surgery will be combined with a second new technology for optical analysis, which increases precision. The two technologies combined take cataract surgery to a whole new level. I’m proud to bring these technologies to my community.”

Trained in microbiology and a former cancer researcher at the Mayo Clinic, where the couple first met, Vergin helped her husband establish his business in the early years and then turned her talents to rearing their two daughters and actively supporting community organizations. She currently serves on the Board of Directors for the Vermilion County Conservation District Foundation.

The couple is well-known for their love of Newfoundland dogs, which Dillman has raised for 38 years. Vergin noted that the dogs lived with Dillman before she did. It was through the dogs that they first made a connection to the College.

“Our first veterinarian when we came to Danville was Dr. George Richards, who was Chairman of the DACC Board of Trustees at the time,” remembered Dillman. “We played a little golf together and he...
invited me to lunch with him and Dr. Ron Lingle, then President of DACC. George told me a lot about the College and asked if I would run for a vacant seat on the Board. It was an easy decision. George is so persuasive and passionate about the College.”

Dillman won the election and served one term, from 1987 until 1993. Though his term ended 20 years ago, the couple remains committed to the College. A previous gift of $25,000 was given by them in honor of five College employees.

When personal computers first became prevalent in work spaces and in the home, Vergin proactively registered for computer classes at DACC. When asked what about the College caught her attention and made her want to support its mission, she replied, “The people are wonderful. I’m very impressed with the instructors; they are enthusiastic and easy to contact if you are having trouble. I am in a women’s group that is interested in education for women, including providing scholarships for women who are experiencing a life change that necessitates returning to school for new skills. I appreciate the work the College does in providing education and work skills for residents to stay in the community.”

Dillman added, “There are many fabulous people and organizations that do great things in Danville, but if I had to pick one organization that is the most far-reaching, both for the present and in the future, it would be this College. The College reaches out and positively impacts the community in so many ways.”

The couple wishes to support go-getters who are goal-driven with their scholarships. They also want to help those who have had life-changing circumstances that have brought them back to college. “We look for a unique personality and character, and take life-changing situations into consideration,” said Vergin. “This year, one of the applicants was someone who had been in high school with our daughter. He was returning to school for new training. He illustrates that there is a place for everyone here, whether you are just finishing high school or have to go back to get new skills to remain in the workforce.”

Scholarship dollars often make the difference between students achieving their dreams or putting them on hold indefinitely. While the number of scholarships awarded was higher than ever before, there remains unmet need. Continuing growth of new scholarships, such as the Dillman/Vergin Family Scholarship is essential to meeting the ever-growing need for financial support of students.

Referring to the couple’s gift, DACC Foundation Executive Director Tracy Wahlfeldt said, “These special people provide life-changing opportunities for students. Finances are the single biggest obstacle to obtaining a college education. Dr. Dillman and Ms. Vergin, and other donors like them, provide the wrecking ball that knocks down those walls between students and their educational goals. Their scholarship dollars build bridges to achievement and we are tremendously grateful for their commitment.”

Groundbreaking for the Julius W. Hegeler II Advanced Technology Center

Officials at Danville Area Community College were pleased to invite the community to attend the Groundbreaking Ceremony for the Julius W. Hegeler II Advanced Technology Center expansion to the current Technology Center. The ceremony was held September 30 to kick off construction of a long-anticipated and much-needed addition to the Technology Center that was originally built in 1972. The expansion will provide additional classroom and lab spaces for advanced manufacturing classes and programs.

Julius W. Hegeler II has committed to a planned gift of $3 million to fund the expansion, as well as to provide $100,000 annually to pay for the interest on the loan required to begin construction immediately. A planned gift is one given by the donor upon his or her death.
Julius W. Hegeler II

Julius W. Hegeler II, long known as a generous supporter of community improvement and youth initiatives, stands out as a champion of education. His valor, business acumen, and generosity of spirit make him a model citizen. As a student, Mr. Hegeler didn’t like being stuck in a classroom; he wanted to be outdoors or up in the sky flying. At Danville High School, he was fortunate to have dedicated teachers who taught him manual arts and mechanical skills that served him well in his business career. His desire to fly led him to enlist in the Air Force during the height of the Korean War.

First Lieutenant Hegeler distinguished himself as an F-86 fighter pilot, flying 70 combat missions. He was one of four pilots who flew the last fighter interceptor mission of the war. For his service, Mr. Hegeler was awarded the Distinguished Flying Cross and the Air Medal with a bronze Oak Leaf Cluster.

Continuing the family tradition of entrepreneurship, Mr. Hegeler, his brother, and three partners co-founded the Peterson Filling and Packaging Company. Peterson/Puritan, Inc., as it was later known, became the world’s largest contract packager of chemical specialties. At one time, the company employed more than 1000 people in Vermilion County and had plants as far away as Switzerland.

Mr. Hegeler decided early to pay forward his good fortune and formed the Julius W. Hegeler II Foundation to further that effort. While he donates to causes outside our area, his heart belongs to this community. It has been remarked that Mr. Hegeler views the people of Danville and Vermilion County as his extended family. His desire is to ensure that this is a good environment in which to live and raise a family.

Mr. Hegeler and his namesake Foundation have supported several local organizations. Unique in that it does not accept donations, the Hegeler Foundation has given millions of dollars to Vermilion County initiatives to build a better community. Some exemplary projects funded by the Foundation include a Women’s Health Center and renovation of the cancer center at then-Provena United Samaritans Medical Center and assisting AMBUCS in building three Playgrounds for Everyone. The Hegeler Foundation was the initial donor for the popular Polar Express event at the Presence United Samaritans Medical Center Foundation Festival of Trees event.

His generosity has been recognized with many awards. In 2002, Mr. Hegeler was named as the 69th annual American Business Club’s First Citizen. In May 2010, he was honored with the Association for Healthcare Philanthropy’s Distinguished Philanthropies Award in recognition for exemplary contributions to community healthcare. In 2011, his Julius W. Hegeler II Foundation was recognized as an Outstanding Philanthropic Foundation by the East Central Illinois Association of Fundraising Professionals and he was inducted onto the Danville High School Wall of Fame.

Danville Area Community College and the DACC Foundation have been long-time beneficiaries of Mr. Hegeler’s time, vision and generosity. He was instrumental in the early years of the Foundation, beginning in 1969 with his first term on the Board. He served as Foundation President in 1973, 1974 and 1975, and since returning to the Board in 2009, has accumulated a total of nearly 30 years of service to the organization. His commitment to the College includes a marble bench in memory of Professor Mary Coffman in April 2009, funding for the Garden Gateway that was dedicated in August 2009, and support for a new Greenhouse in 2010. In recognition of his many contributions to the founding and continuing success of DACC, Mr. Hegeler was honored at the DACC Foundation Donor Recognition Ceremony in October 2009 and at the College’s Founders’ Day Celebration in 2011.

Mr. Hegeler rarely waits for people to bring him projects; he searches out issues to address and ways to contribute. In casual conversation, Mr. Hegeler asked President Jacobs what projects were on the College’s wish list. She replied that the Technology Center was overcrowded and was in desperate need of additional space for advanced manufacturing programs. Within a few weeks, Mr. Hegeler contacted Foundation Director Tracy Wahlfeldt and stated that he had come up with a plan to fund the needed expansion. The final result is a pledge of more than $3 million of his personal wealth as a historic planned gift to the DACC Foundation to be used for the project. The gift will be the largest in the Foundation’s history and will be used to create the Julius W. Hegeler II Advanced Technology Center as an expansion of the Technology Complex. While the principal gift will come to the Foundation upon his death, Mr. Hegeler has agreed to provide $100,000 annually for the interest on the loan until that time, hopefully many years in the future. Mr. Hegeler’s generosity allowed the College to secure the funds to start construction immediately rather than waiting until he has passed and cannot see the results.

Julius W. Hegeler II is an honorable man who finalizes commitments with a handshake. He has touched thousands of lives in Vermilion County, though most will never know of his contributions. His quiet dedication to community health, education and improvement is undertaken not for personal recognition, but in gratitude for a life well-blessed.
Vickie Miller Wins Regional Trustee Leadership Award

For the second year in a row, a Danville Area Community College Trustee was honored by the Association of Community College Trustees with a regional award. Vickie J. Miller, former Chair and long-time member of the DACC Board of Trustees was recognized as the top Community College Trustee in nine states by the ACCT. Miller was named the 2013 Central Regional Trustee Leadership Award winner in recognition of exemplary service by a currently-serving community college board member. Last year, DACC Board Chair David Harby received the same award. Elected to the Danville Area Community College Board of Trustees in 1991, Mrs. Miller currently is serving her fourth consecutive six-year term. In 2001, she was unanimously selected by her peers as Chair, but chose to step down from that role in 2012 due to health concerns. She served as Vice Chair from 1999-2001. Throughout her tenure, Mrs. Miller has been universally recognized as a champion for campus and community activities that support and promote education.

Mrs. Miller has been and remains an energetic and enthusiastic member of the Illinois Community College Trustees Association. Her leadership roles in that organization have included terms as the State Secretary, a member of the Executive Committee, and Chair of the East Central Region. She has received three Awards for Trustee Education.

“The role of the trustee is to hold the institution in trust for the community,” is Mrs. Miller’s credo. Her priorities include anticipating and meeting the needs of the community, providing access to quality higher education and occupational workforce development, and forging partnerships with business and industry. Mrs. Miller believes that each trustee has a role in promoting the College and acting as an advocate for the College in the community.

Mrs. Miller and Mr. Harby are not the first back-to-back honorees from DACC to receive a regional award. Former DACC Board members Dr. George Richards and Mrs. Nancy Bates also were recognized with Central Region Trustee Awards in 1998 and 1999, respectively. The ACCT Central Region is comprised of more than 200 two-year institutions in Illinois, Indiana, Iowa, Kentucky, Michigan, Minnesota, Missouri, Ohio and Wisconsin. ACCT represents more than 6,500 elected and appointed trustees who govern over 1,200 Community, Technical, and Junior colleges in the United States, Canada and England, with enrollment of more than 11 million students.

College Sustainability Efforts Win Governor’s Award

Danville Area Community College was one of only seven Illinois colleges and universities to have been honored with the 2013 Governor’s Sustainability Awards presented by the Illinois Sustainable Technology Center (ISTC). Since 1987, ISTC has presented Governor’s awards to organizations in Illinois that have demonstrated a commitment to environmental excellence through outstanding and innovative sustainability practices that will also save money and help the economy.

DACC received a Silver Sustainability Award that recognizes institutions who have committed to making targeted commitments to greening their operations and monitoring their performance. To qualify for the designation, DACC pledged to achieve the following goals by 2015:

• To foster student involvement on steering committees or advisory councils that guide administration on issues of campus sustainability;
• Using 2010 as a baseline, to reduce energy usage, water usage, and solid waste by 20 percent by 2020;
• To update the campus’s waste management plan, including increasing the availability of recycling and e-waste disposal options; and
• To engage the community on sustainability-related projects, including the promotion of a community garden with a local neighborhood association and Keep Vermilion County Beautiful’s efforts to promote sustainability throughout the county.
DACC Foundation Recognizes Donors

Each gift that the DACC Foundation receives is meaningful to our mission of serving the College and our students. In May, the Foundation hosted a Donor Recognition dinner to honor those individuals and organizations that have made significant contributions to the College in recent years. The event included tributes by friends of the donors, as well as comments from scholarship recipients.

The following donors were honored:

Hoopeston Area Healthcare Foundation

The Hoopeston Area Healthcare Foundation was initially created to assist land to the College to make possible the DACC Higher Learning Center – Hoopeston. CHRH CEO Harry Brockus and his staff were also instrumental in garnering the community’s financial and moral support for the initiative. The Hospital donated the proceeds of their annual golf tournament to support the Hoopeston Center.

Presence United Samaritans Medical Center

Danville Area Community College and Presence United Samaritans Medical Center have been partners in education since 1950. The two were recognized for their exemplary partnership by the Illinois Community College Trustees Association with the 2011 Business/Industry Partnership Award. The relationship has grown beyond nursing education to include support for all health professions programs at DACC. From equipment donations to advisory committees, the long-term benefit of the partnership with Presence is a community that retains caring, well-paid, well-trained healthcare professionals.

Bob & Barbara Muirhead

The Muirheads have supported Danville Area Community College through apprenticeships and work-study positions at their family business, Holmes Brothers.

In 2011, as part of the Endless Possibilities: Student and Workforce Success Campaign, Frank and Sylvia Switzer established a scholarship fund and made provisions for a sizable planned gift of land to further endow that fund. Through their gift, the Switzers became Charter Members of the Mary Miller Society, which recognizes donors who have made provisions for planned or deferred gifts to the DACC Foundation through their estates. Once finalized, the gift of land that was made upon Mr. Switzer’s passing in 2013 will be the largest gift of its kind that has been received by the Foundation.

Integrity

Trusting relationships and an ethical reputation with those we serve (students, faculty, employees, community, business, other educational institutions, and government).

David W. Harby with scholarship recipients

“As a member of the Student Senate at Danville Junior College in 1972, I admired the service that the Trustees provided and dreamed of one day serving the community as they did. Now I have the satisfaction of knowing that I am helping future generations obtain an affordable, accessible, incomparable college education at DACC.”

David W. Harby, Chair, Board of Trustees

Alan Puzey with scholarship recipients

“As Susan and I established our scholarships because we felt the need to give others the same chance at success that we have been afforded in our lives. Education is the foundation of the building blocks needed for a person to become successful, but many people today simply don’t have the means and opportunity to further their education. Our scholarship funds have helped many students of all ages and stages of life get that chance and we have been gratified to see the results.”

Alan Puzey, President, DACC Foundation Board of Directors

DACC Celebrates Founders

Danville Area Community College continued its tradition of honoring those who helped form the foundation of success upon which the college has been built with the 2013 Founders’ Day Celebration.

With more than 100 guests in attendance, the College honored Danville District #118, the founding organization for DACC, represented by Supt. Mark Denman; Mrs. Peggy Gardiner, the first and only secretary who worked for all five past presidents of the College; Miss Marjorie Holmes, the first Dean of Females; Mr. and Mrs. Lou and Sybil Mervis, founding community members; and Mrs. Marilyn Satterwhite, the founder of the DACC Business division.

Mr. Michael Hulvey, Executive Vice President of Operations for Neuhoff Broadcasting, served as Master of Ceremonies for the event. Presenters included Richard Cheney, DACC Board of Trustees; Dr. Alice Jacobs, DACC President; Dave Kietzmann, Vice President of Instruction and Student Services; Barb Todd, Director of the Fitness Center and previous Founders’ honoree; and Judy K. Myers, financial consultant and former DACC Business instructor.

2012-2013 Service & Achievements

Donors Give Record Amount to DACC Foundation

The Danville Area Community College Foundation announced the official end of the three-year Endless Possibilities: Student and Workforce Success Campaign on May 19, 2015. The campaign is a celebration of the foundation’s leadership and donors of substantial gifts. Foundation officials were pleased to announce that the campaign’s goal to raise $2 million was surpassed by 5 times that amount, raising $10,111,035 dollars for areas identified by the College as vital to future student success and community workforce development initiatives. More than 1,000 donors chose to support the DACC Foundation and the College with their gifts and pledges throughout the campaign. The Endless Possibilities: Student and Workforce Success Campaign addressed the shortage in funding for student scholarships, workforce development initiatives, and technology innovations.

One major aspect of the campaign, support for student scholarships, was a resounding success. As a result of the Campaign, scholarships have risen from 250 scholarships worth more than $200,000 for the 2010-2011 academic year to 411 scholarships valued at nearly $425,000 for the 2013-2014 academic year. The campaign also established the Mary Miller Society in recognition of donors who have made provisions for planned gifts.

The Mary Miller Society was created as part of the Endless Possibilities: Student and Workforce Success Campaign to celebrate donors who not only recognize the importance of education today but also support the college’s efforts to ensure that the programs and educational offerings at DACC keep up with the ever changing needs of the workplace. The DACC Foundation would like to thank the following individuals for joining the Mary Miller Society and for keeping opportunities available for all who seek a better life or enhanced skills. Your support provides resources for future generations of Danville Area Community College students.

A Chance for All

Donors Give Record Amount to DACC Foundation

George and Joan Richards with scholarship recipient

Why do I give money to DACC for scholarships? I think it is a religious perspective with me. Sin is not always doing wrong things, it is also doing nothing! If I can enable someone to have a better life, or help Danville to have a well-qualified work force to attract industry and work for its people, I feel called to be a good steward of what I have received.”

Nancy Bates, DACC Foundation Board and former Chair of the DACC Board of Trustees

Assuring Student Success Through Stewardship

We are scholarship donors because the opportunity for students to receive a high quality, cost effective education at DACC makes a positive difference in their lives and their communities.”

George and Joan Richards, former DACC Foundation Board Presidents
With gratitude we recognize these 2013 honor and memorial contributions which provide a lasting tribute by enriching a DACC’s student educational journey.

Finance Excellence

The Certificate of Achievement for Excellence in Financial Reporting in 2013 has been awarded to Danville Area Community College, Community College District No. 507 by the Government Finance Officers Association of the United States and Canada (GFOA) for its comprehensive annual financial report (CAFR). The Certificate of Achievement is the highest form of recognition in the area of governmental accounting and financial reporting, and its attainment represents a significant accomplishment by a government and its management.

Achievement in Financial Reporting has been awarded to the Finance and Administration Office, Danville Area Community College, Community College District No. 507, as the department designated by the government as primarily responsible for preparing the award-winning CAFR.

This CAFR has been judged by an impartial panel to meet the high standards of the program including demonstrating a constructive “spirit of full disclosure” to clearly communicate financial story and motivate potential users and user groups to read the CAFR.

An additional indicator of financial excellence is the College’s “A2” Moody’s Rating, which is only two steps from the highest rating of “AAA.”

$304,063

Danville Area Community College uses a financial statement format required by General Accounting Standards Board (GASB) statement #34. This format is designed to emulate corporate presentation models so that all of the College’s financial activities are consolidated into one total. For this presentation, all revenues and expenditures have been summarized in two categories.
REVENUE SOURCES
The major components of revenues include government grants and contracts, local property taxes and tuition and fees. The State of Illinois supports public community colleges through a combination of apportionment, personal property replacement tax, vocational and adult education, equalization and other restricted grants. The Federal government provides funding through restricted grants, and student financial aid scholarships.

Local property tax revenues are based on the district’s equalized assessed valuation of $911,599,553 at a levy rate of 63.07 cents per $100 of assessed valuation. Danville Area Community College’s tuition for FY13 was $98 per credit hour for in-district residents, plus a $12 per credit hour activity and technology fee.

The remaining sources of revenue include investment income, fees and sales from Auxiliary Enterprise operations, miscellaneous student fees, and facility rental fees.

EXPENSE BY TYPE OF SERVICE
Instruction includes activities dealing directly with the College’s teaching process. This category includes instructors’ salaries, benefits and course supplies as well as personnel and supplies required to plan, implement, and manage programs and curriculum.

Academic Support represents activities and tools that directly support the instruction process. Expenses include library operations, instructional media, network and computer services.

Student Services include advising, college activities, counseling, financial aid, registration and records and any other services which provide nonacademic support for students.

Public Service is comprised of noncredit courses, workshops, exhibits and other expertise designed to be of service to the public.

Operations and Maintenance relate to costs associated with repairs, maintenance, public safety, custodial and other expenses necessary for the proper and safe operation of the College’s physical plant.

Institutional Support constitutes expenses for central executive-level services and support services that benefit the entire institution. Examples include expenses for the Board of Trustees, management information system, business office, human resources, etc.

Financial Aid consists of scholarships and grants for students received from various state and federal agencies.

Auxiliary Enterprises include those activities where a fee is charged for a service. Examples of these services at Danville Area Community College include the Bookstore and the Child Development Center.

On-Behalf payments are made by the State of Illinois to the State Universities Retirement System (SURS) on behalf of the College to match employee retirement contributions.

Depreciation recognizes the financial measurement of the cost of fixed assets prorated over their estimated useful service lives.

EXPENSES BY TYPE OF COST
Employee salaries account for the College’s largest cost category, as is the case in any service organization. When combined with employee benefits, these expenses account for nearly half of the College’s expenditures.

Employee benefits include health, Medicare and unemployment insurance costs plus retirement plan costs.

Services refer to purchased services with outside agencies and vendors.

Materials and supplies consist of administrative and instructional materials and supplies.

Utilities include electricity, gas, water, telephone and refuse collection.

Other expenses include student financial aid, depreciation, professional development, fixed charges and other miscellaneous charges.

Fiscal Year 2013 Expenditures By Type:
Salaries $11,306,338
Employee Benefits 6,026,405
Services 1,022,821
Material and Supplies 3,008,744
Utilities 771,773
Scholarships 1,773,027
Depreciation 1,773,027
Other 891,463
Total Operating Expenses $26,574,273
