Safety and Health Consulting Services

INDUSTRIAL HYGIENE

DACC offers a wide variety of industrial hygiene services including:

- Health Hazard Assessments
- Indoor Air Quality Assessments
- Compliance Assistance
- And more...

ERGONOMICS

DACC will assist you in implementing an effective Ergonomics Program to achieve a safer work environment and compliance. DACC incorporates six basic elements of the ergonomic process when assisting companies in the development of their own ergonomics program:

- Management Leadership and Employee Involvement
- Hazard Identification and Information
- Job Hazard Analysis and Control
- Training
- Medical Management Guidance
- Ergonomics Program Evaluation

SAFETY & HEALTH MANAGEMENT PROGRAM

Danville Area Community College will enhance your Safety and Health Management Program by developing customized safety policies and procedures and providing job site inspections/audits. We can be your personal safety consultant and assist you with compliance involving occupational safety and health regulations. This service is especially helpful for employers who do not currently employ a safety professional.
