

Computer Communications & Networks

Career Programs at Danville Area Community College

Computer Communications & Networks AAS: This program will provide training and education for individuals interested in developing their knowledge and skills as a local area network administrator. The courses emphasize practical skills required to perform duties in the work environment under supervision of an experienced local area network administrator. Students will participate in occupational worksite experiences. This program prepares the student for the Microsoft Certified Professional (MCP) examination and the Cisco certification exam, CCNA.

Computer Communications & Networks Certificate: This provides intense training and individuals with prior working knowledge in the networking field. The courses emphasize practical skills required to perform duties in the networking environment. This program prepares the student for the Microsoft Certified Professional (MCP) examination.

Cisco Certificate: This program provides intense training and education for individuals with prior experience in the networking field. This sequence of courses is designed to meet employment standards for the networking industry. This program prepares the student for the Cisco certification exam: Cisco Certified Networking Associate (CCNA).

Program Specific Courses Selected from the Following:

- ◆Cisco Network Academy
- ◆Managing a Network Environment
- ◆Network Security
- ◆Client Operating Systems
- ◆Server Operating Systems
- ◆Wireless Networking

Job/Employment Information:

Positions You are Trained for: Network or computer systems administrators.

Where Can You Find a Job? Many work in other areas, such as for government agencies, manufacturers of computer and related electronic equipment, insurance companies, financial institutions, and universities. A growing number of computer professionals are employed on a temporary or contract basis—many of whom are self-employed, working independently or as contractors or self-employed consultants.
