

Golf Course Management

Career Program at Danville Area Community College

The Golf Course Management program gives the student the technical and practical knowledge needed to maintain golf course turfgrass. Emphasis will be placed on disease and insect identification and control. Grass establishment, fertilization, irrigation, aerification, and thatch control are also covered. An introduction to golf course hole design, layout, and construction techniques are also discussed. Students will also have a six month internship program starting in April and ending in October. This program is an occupational program typically not designed to transfer, however, this program has been articulated to some senior institutions. Please contact a counselor for specific details.

Program Specific Courses Include:

- Golf Course Management
