

Health Information Technology

Health Information Technology

Career Program at Danville Area Community College
Financial Aid eligible degree program

The Associate Degree in Health Information Technology (HIT) is granted to those students who successfully complete the career curriculum in Health Information Technology. This program is an occupational program typically not designed to transfer, however, this program has been articulated to some senior institutions. Please contact a counselor for specific details.

The DACC Health Information Technology program is accredited by the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM).

It is an occupation that is unlikely to be profiled on a TV hospital drama, but this behind-the-scenes healthcare profession is in the spotlight. It is one of the fastest growing fields in the U. S. The field of Health Information Technology combines health care with information technology. The pressing issue of properly managing and protecting patient health information has steadily increased the demand for Health Information Management professionals, the gatekeepers of this critical data.

Health information management professionals maintain, collect and analyze the data that doctors, nurses and other healthcare providers rely on to deliver quality healthcare. They are experts in managing patient health information and medical records, administering computer information systems and coding the diagnosis and procedures for healthcare services provided to patients.
