

Achieving the Dream

Data Team Meeting

Thursday, August 14, 2014

Copper Penny Room

Present: Dr. Andrew Kerins, Barbara Wheldon, Margie Larson, Jessica Miles, Cindy Peck

Distributed KPI Data Updates with a Data Folder

- This KPI data is it until November/December
- Hope to update this information twice a year
- Continuing to keep an eye on things, but we will probably not examine this KPI data again until November/December

Data Snapshots

- Being able to look at other problems that people may want to address
 - o Gather data for other projects and help analyze this

Questions about KPI Data

- KPI #5
 - o Would MATH 107 become a gatekeeper course?
 - Currently, it would not, because it is not established as a high enrollment/low success course
 - We would probably need at least a year of data before deciding whether we should add it as a gatekeeper course
 - The goal would be that the course is successful, so we would not need to add it as a gatekeeper course
- KPI #1
 - o Would we do number of graduates as a percentage of total enrollment or number?
 - o It will be considered a number of certificates and degrees based on total enrollment, so it will be accurately reflected outside of changes in enrollment

Meetings this Semester

- Andrew sent out the meeting dates
 - o Jessica and the IE office are going to be very busy getting ready for the Moving Data to Strategies In-Service, so our data gathering will be stalled for a few months
